

What's New on DSD Shares?

Philip Paul

This quarter we have updated many elements of the DSD Shares Website.

First, we have added a CR Corner. Working with our District CR Coordinator, Ralph Stream we have pulled together some of the latest CR Class materials given at this year's and last year's programs.

You will find : Ralph's treatment of Chapters 1 through 4 in the CR Manual

Connie's program on Chapter 6 – Fertilizers (Updated)

Walt Reed's program on Chapters 7 & 8 on Chemical Safety

Phil Paul's program on Chapters 9 & 10 on Insects and Diseases

You may want to print these off as they are excellent reference tools fully illustrated for use in the field by all CRs. Ralph will be posting more material here as time goes on.

Second, In the Editor's Forum we have added:

The new ARS Logo depicting the Rose as America's Floral Emblem- both a white background and a transparent background are there for your use.

An article with 15 tips for newsletter editors by Phil Paul

An article on changes and new features of Microsoft Software – Word and Publisher

Third, the Library has two new documents:

Bitten by the Exhibition Bug- A classic series of articles by Jeff Mogilewicz

A second edition of Stephen Hoy's "Singularly Beautiful Roses" for your use

Fourth, The Membership area has a new article by Anne Paul entitled "Tips on Membership"

Also in this section are two new membership brochures produced by Carol Green of Marion County RS and Al Whitcomb of Tampa RS. These are provided to help you with ideas to design your own society brochure.

And last, the Speakers' Bureau information has been updated.
